

~ Box Spring. ~

One mile north of New Albany, affords the best medical water for all diseases of the blood, liver, and urinary organs ever discovered. It will cure dyspepsia, indigestion, rheumatism, neuralgia, liver complaint, kidney diseases, and all similar ailments, and is pronounced by physicians, after analysis and trial, superior to any mineral spring water as a remedial agent. This spring is on the farm of Capt. John Box, who keeps a full and fresh supply of the water constantly on sale at the office of Huncilman & Cottom, in the Opera House, and at Hoffeld's Drug Store.
